

MOBIUS ISO 27001 INTERNAL AUDIT ASSISTANCE

MOBIUS
CONSULTING

Actualising change

WHY MOBIUS

At Mobius, we believe that organisations cannot confidently accelerate their digital journey without trust. That's why we work with you to build and implement, relevant and bespoke solutions to secure your digital risk landscape and provide assurance to required stakeholders. If you are trying to obtain certification or are already ISO 27001 certified, we provide the relevant assurance services against the Internal Audit requirements per the standard.

Expertise and resource optimisation: A gap most organisations face is a shortage of quality, skilled resources within their Internal Audit departments. Mobius Consulting offers you access to specialised ISO 27001 certified resources (ISO 27001 Lead Auditor and Lead Implementer) to supplement your Internal Audit teams to perform ISO 27001 Internal Audits which are a requirement to initially obtain and maintain your ISO 27001 certification.

Experience: We have a proven track record of performing audits aligned to ISO 27001:2022 and 27002:2022 across several organisations and industries as well as assisted numerous clients with initially obtaining and thereafter maintaining and retaining their ISO 27001 certification.

ISO 27001 INTERNAL AUDIT REQUIREMENTS

Per the ISO 27001 requirements for performance evaluation, there is a mandatory requirement to ensure the planning and implementation of Internal Audits to evaluate information security performance and effectiveness of the Information Security Management System (ISMS).

An ISO 27001 Internal Audit review is a comprehensive evaluation of your organisation's ISMS to ensure the ongoing performance and required improvements of the ISMS against the ISO 27001 standard. The purpose of this review is to provide internal assurance on how the organisation identifies and addresses existing and emerging security challenges on an ongoing basis, as well as ensure ongoing compliance with the ISO 27001 standard and the effectiveness of in-scope information security controls.

BENEFITS

Assurance over ISMS compliance, performance and improvement

ISO 27001 initial certification and certification maintenance

Reduce costs of retaining highly skilled internal capability

Improved information security risk management

MOBIUS ISO 27001 INTERNAL AUDIT ASSISTANCE

APPROACH / PHASES

The Mobius Approach for the ISO 27001 Internal Audit will be as follows:

PHASE 1

PLANNING AND DISCOVERY

Planning and discovery of information security in the context of your organisation, the ISMS and review of related supporting documentation.

PHASE 2

CURRENT STATE REVIEW

Assessment to ascertain the current state of security practices within your organisation's scope against the ISO 27001 and ISO 27002 standards.

PHASE 3

REPORTING

Correlate findings and improvement areas identified across the various aspects of the above current state review. Findings, gaps, and recommendations are added to a written report that is issued to you, our client, to feed into the continuous improvement of the ISMS as well as to evidence compliance to ISO 27001 requirement "9.2 Internal Audit".

END RESULT

Helping you maintain your ISO 27001 certification through the performance of cost-effective and efficient Internal Audits of your ISMS.
