

MOBIUS ISO 27701 CERTIFICATION ASSISTANCE

MOBIUS
CONSULTING

Actualising change

With the ever-increasing number of Data Protection and Privacy laws and regulations being enacted across the globe, demonstrating good practices and compliance to keep data safe and be compliant is a major organisational challenge. Organisations often struggle to take meaningful steps in the right direction, yet both the solution and the path towards it are neatly summarised by ISO 27701 – the global best practice for Privacy Information Management Systems (PIMS).

The advantages of ISO 27701 certification are numerous. For one, your clients and partners see that their data is in safe hands, enhancing your reputation as well as unequivocally demonstrating your governance and compliance efforts to regulatory bodies. And beyond the realm of obligation, your proactive approach delivers a host of potential benefits to your bottom line, boosting your competitive advantage, improving efficiency, mitigating both the cost and the impact of related non-compliance, and supporting your organisation's ability to move forward at pace.

The certification process is rigorous and comprehensive, but with Mobius at your side as your implementation partner, it's a straightforward journey tailored end-to-end for your specific needs and goals. And since ISO 27701 certification isn't a once-off exercise but a process of continuous monitoring and improvement, we ensure the transfer of valuable knowledge and skills, also providing PIMS maintenance for clients who are already certified.

Whether you're just beginning or maturing your journey, we'll help you enhance your organisation's privacy processes and practices.

THE MOBIUS ADVANTAGE

EXPERTISE

- Specialist PIMS knowledge and global expertise
