

MOBIUS MICROSOFT 365 SECURITY ASSESSMENT

MOBIUS

CONSULTING

Actualising change

The evolving threat of Business Email Compromise, Phishing and Ransomware has affected all organisations. Finding solutions to assist in safeguarding against these potential threats is therefore vital for business resilience. With many organisations already relying heavily on Microsoft 365 for core business operational tasks and communication, ensuring its security features have been configured optimally should be a top IT priority.

Although Microsoft provides defences for their platform, default settings may still leave your systems vulnerable. To minimise potential risks, our team of experts can assist by evaluating your Microsoft 365 configuration against industry best practices.

WHY MOBIUS

Following the M365 CIS benchmarks, Mobius adopts an approach tailored to evaluate your unique usage and requirements of M365. This enables us to understand the specific risks and challenges your organisation encounters, allowing us to provide recommendations tailored to your needs.

HOW

Our standard assessment encompasses three phases to ensure a thorough examination of your Microsoft 365 configuration, as detailed below:

- Planning and Discovery
- Current State Assessment
- Develop High-Level Roadmap

THE END RESULT

Our assessment aims to determine your current security posture, identify potential areas of disruption, and pinpoint vulnerabilities related to data loss or unauthorised access. We will then provide practical recommendations to better secure your specific environment. The end result? Enhanced defence mechanisms to further protect your organisation against potential cyberattacks.

BENEFITS

COST SAVINGS

Identify any unused or under-used security features, helping to keep your data secure and removing unnecessary third-party costs.

IDENTIFY MISCONFIGURATIONS

Detailed insight into any misconfigurations which may increase the attack surface you are exposing to attackers

INFORMS INVESTMENT DECISIONS

With your current licensing and feature usage landscape understood, you will be better informed.

DOCUMENTS COMPLIANCE

Documentation created can be used as evidence for compliance purposes and audits.

MOBIUS MICROSOFT 365 SECURITY ASSESSMENT

MOBIUS CONSULTING - 3 STEPS TO SECURITY ASSESSMENT PROCESS

We work with your key stakeholders to understand the broader organisational context, including core business functions and vital IT assets crucial for day-to-day operations.

PLANNING AND DISCOVERY

Understand existing M365 licensing and use within your business. Understand existing Information Security policies, governance, and architecture from a people, process, and technology perspective.

CURRENT STATE ASSESSMENT

Evaluate current M365 configurations against industry benchmarks and review security configurations. Assess security features, access control, and logging mechanisms.

DEVELOP HIGH-LEVEL ROADMAP

Correlate the gaps / findings and develop a detailed report outlining the outcome of the assessment with improvement recommendations indicating priority, duration in alignment with relevant key control requirements that feeds into a high-level roadmap.

THE END RESULT

You have a clear view of the Microsoft 365-specific threats relevant to your organisation and a prioritised roadmap tailored to your Microsoft 365 setup, outlining steps to improve your security posture.
